Profile

During college, I learned advanced programming, ASP.net, and C# And VB.Net. I also learned Java programming. I worked for different companies. And I gained good management and programming experience. I worked on some web development projects with ASP.Net MVC, ASP.Net Core, React most of which were large, enterprise projects with thousands and millions of users.

A few of my skills :

- Highly skilled in designing, testing, and developing software

- Thorough understanding of data structures and algorithms

- Knowledgeable of back-end development best practices.

- Hands-on software troubleshooting experience.

- Proven track record of proper documentation for future maintenance and upgrades

- I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

- I can align, and grow world-class product teams from 10 to 100 people.

- I am a calm and compassionate person.

- I love to win, but helping the team win gives me greater joy

- I educate, refine and drive myself to be a better person

- I am constantly learning because I never settle

- I focus on making high-quality decisions

- I enjoy meeting new people and hearing new perspectives.
